PETROZAVODSK INDUSTRY PROGRESSES -- Leninskoye Znamya, No 21, 1 Feb 49

V. I. Vasil'yev, secretary, Petrozavodsk City Committee of the KP(b) Karelia, gave the main report on the city's industry at a meeting of Petrozavodsk Party workers held on 28 January. Petrozavodsk industry fulfilled the 1948 gross production plan 105.6 percent, increased production 20 percent over 1940 and 39 percent over 1947. Two million more rubles' worth of production were put out in the second quarter 1948 than in the first quarter, and 2.8 million more rubles of production in the third quarter than in the second. Production in the fourth quarter was 136 percent of the first-quarter volume. In 1948 productivity of labor increased 18 percent over 1947. The city's industry saved 13,300,000 rubles above plan in 11 months of 1948.

Thirty-two enterprises fulfilled the gross production plan ahead of schedule and produced 8 million rubles' worth of goods above the plan. Among these enterprises were the shipbuilding plant, the Omega Machine-Building Plant, the Solomenskiy Sewmill, the automobile repair plant, the mica factory, the gas generator plant, and others. The 16 lagging enterprises, including the Standard House-Building Combine, the construction-parts plant, the Solomenskiy and Sulazhgorakiy brick plants, failed to produce 4 million rubles' worth of goods called for in the plan.

Only four of the city's enterprises fulfilled the plan in all respects and for all types of production. These were the shipbuilding plant, the mica factory, the meat combine, and the felt boot artel. Many enterprises are producing low-quality goods. Losses from defective production in 18 enterprises amounted to more than 1,900,000 rubles in 1948.

Only 13 enterprises of the city fulfilled the plan for capital construction and the 1948 plan was not fulfilled for the city as a whole.

The 1949 plan calls for an increase of 40.9 percent in production over 1948. Almost all large-scale enterprises of the city must adopt production of new types of goods. The Omega plant will start production of 3-drum skidding winches for the timber industry; the metal plant will start production of internal combustion engines; and the shipbuilding plant, new types of fishing boats. The 1949 output of individual products, as compared with the 1948 output, will be as follows: lumber, 112 percent; brick, 129 percent; mica, 129 percent; internal combustion locomotives (motovoz), 219 percent; nails, 12 times greater; standard houses, 5 times greater. The plan also calls for completion of 33,000 square meters of new production area, continued reconstruction of the Omega Plant, start of construction of a new automobile repair plant, and completion of nearly 20,000 square meters of housing. According to the plan, labor productivity must increase 14-18 percent in industry and 12 percent in construction projects and costs of production must be decreased no less than 6 percent.

The Petrozavodsk Standard House-Building Combine has pledged to decrease the time allowed to construct and equip ten houses, from 45 days to 22 days, by improving the organization of labor, carrying out innovations in the production process, and decreasing the time spent in producing parts. The plant expects to release 730,000 rubles of working capital during 1949 and save 530,000 rubles.
